# THE AMERICAN EDUCATIONAL CATALOGUE FOR 1899

[PUBLISHERS' PRICES.]

**NOTICE.**—In this Catalogue only prices made by publishers themselves are given—retail, if retail, in first column; "net" (wholesale), if "net," in second column; where a "mailing" percentage is specified by the publisher, the "mailing price" is given in the retail column marked with an asterisk (\*), in addition to the wholesale price. When price-columns are left blank, the publisher failed, on application, to furnish price. A double asterisk (\*\*) in price-columns designates books forthcoming. New books, issued since the publication of the Catalogue of 1898, are designated by a single asterisk (\*) before title.

**In comparing prices or ordering at retail, private buyers should bear in mind that a percentage must be added to prices quoted at wholesale, to cover freight, handling, delivering, etc. Discounts on quantities vary on different lines, according to the kind of prices adopted by the respective publishers.**

## A SYSTEM OF ETHICS

By FRIEDRICH PAULSEN, Professor of Philosophy in the University of Berlin. Edited and translated by Frank Thilly, Professor of Philosophy in the University of Missouri. Crown 8vo, 720 pp., \$3.00 net.

The value of Professor Paulsen's Ethics was at once recognized upon its first appearance in German and the desirability of an English translation has been so often and so urgently advised that the publishers have been pleased to undertake it. Not only as a text-book for colleges and universities, but as a treatise appealing to the general educated public, does this work lay special claim. By many competent critics it is regarded as the most inspiring and suggestive discussion of morality thus far written.

This unique book presents a "scientific method" of studying the great writers, devised by its author after long experience in teaching, and tested for years in his classroom. It is a study of rather than *about* the masters of English prose, mainly through citations of the most authoritative published criticism on each writer, with analyses of the styles of the various authors.

This new volume by Professor George Trumbull Ladd brings to its close the series of books in which the author has dealt with the general problem of reality—things and minds—and the possibility and the validity of knowledge. The former volumes were "Philosophy of Knowledge" and "Philosophy of Mind."

### ELEMENTARY PHYSIOLOGY

By BENJAMIN MOORE, M.A., of Yale University. With 125 illustrations. Crown 8vo, 302 pages, \$1.20.

This book contains an outline of the structure and functions of the body suitable for medical students and for students commencing the study of physiology. It aims at supplying a certain amount of anatomical description to the junior student who is too often expected to commence his physiological work without this indispensable preliminary knowledge of the general structure of the body. The subject is described from the practical point of view, and the student is taught, both in the text and by means of an appendix of practical exercises, how to accompany the study of theory with simple experiments.

**Plane and Solid Geometry.** By JAMES HOWARD GORE, Ph.D., Professor of Mathematics, Columbian University. Crown 8vo, 220 pages, \$1.00.

This exclusion leaves out all those propositions which are not of practical value, and such as are not of use in applied mathematics. The book prepares for college entrance examinations, and should appeal to all teachers who are in sympathy with the movement to shorten the college preparatory curriculum.

## A New Series of Readers.

MAYNARD, MERRILL, & CO. take pleasure in announcing that after several years of most careful preparation they are about to publish a series of school readers under the editorial supervision of Harry Pratt Judson, LL.D., Dean of the Colleges of Arts, Literature, and Science, University of Chicago, and Dr. Ida C. Bender, Supervisor of Primary Grades in the Public Schools of Buffalo, N. Y.

These books have been prepared with the hearty sympathy and very practical assistance of many distinguished educators in different parts of the country, including some of the most successful teachers of reading in primary, intermediate, and advanced grades.

The names of the editors are a guarantee that from both a pedagogical and literary point of view the new readers will command the most cordial approval of the educational public.

The editors and publishers believe that present conditions justify the publication of a new series of readers on a new plan, but although the books will contain many novel features, great care has been taken to embody such characteristics of the old-style reading book as long experience in the school-room has proved to be valuable and important.

The mechanical appearance of the books will be in keeping with the excellence of their contents, and will leave nothing to be desired with respect to paper, printing, binding, and illustrations.

The new readers will contain a large number of colored pictures, which will not only greatly increase their attractiveness, but will also add very much to their educational value.

The first book will be published about August 1st, and the other numbers of the series will follow at short intervals.

# THE KISS AND ITS HISTORY.

By CHRISTOPHER NYROP, PH.D.,  
Professor of the Roman Languages and Literature at  
the University of Copenhagen, Denmark, Officer of  
Public Instruction of France; also Honored by  
the Gold Medal for Merits of Roumania.

This pretty volume has been, without a single exception, most favorably received by the leading newspapers of the United States, from which we quote only a few extracts:

"Prof. Nyrop writes of the kiss with the fervor of a poet, the judgment of an epicure, and the learning of a pundit."—*The Chicago Times-Herald*.

"It is so replete in its historical facts, admirable in its analysis of objects and motives . . . as to be a delightful study for any reader."—*The Inter-Ocean*.

"It is a pretty little volume . . . and gives a great deal of curious information. Prof. Nyrop writes pleasantly, and knows how to border along delicate themes without offense."—*The Chicago Chronicle*.

" . . . Interesting and not nauseating."—*The St. Louis Globe-Democrat*.

"If Prof. Nyrop has overlooked any kiss that ever happened, it will be detected by some one who knows more about the subject than I do."—*The Louisville Courier-Journal*.

"It is now possible for young and romantic people to learn all that is known about kissing, and in book form."—*The Boston Globe*.
